

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the data analysis, there were some important points that can be concluded, they were:

1. The college-students in STAI-JM Tanjung Pura showed positive attitudes towards English. There were 17 respondent or 68% of respondents showed positive attitudes towards English in STAI-JM meanwhile there were 8 respondents or 32% of respondents showed negative attitudes
2. The college-students had positive attitude towards English in the level of receiving, valuing, and organizing values. On the other hand the college-students had negative attitude towards English in the level of responding and internalizing values
3. The college-students had positive attitude towards English because of some reasons such as: they are proud of speaking in English and they aware of language norms. But on the other hand they were not loyal to use English.

5.2 Suggestion

In line with this research, some important suggestions were required to the other students, the next researchers, and the education authority, they were as the following:

1. To other researcher, the researcher suggests to find out a new phenomenon of attitude toward language in another context so it will produce newest findings of the realization of language attitude.
2. It suggested to the STAI-JM Tanjung Pura to continue the International Class Program to obtain the college-student needed for their better future.
3. It also suggested to education authority of policy maker in STAI-JM Tanjung Pura to give better facilitation, motivation, exercise and infrastructure to the college-students also for the lecturers.
