

CHAPTER V CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the data, it was found that the students' score in experimental group was higher than the students in control group. The total score and the mean score in experimental group showed that there was a significant improvement of the students' score between the pre-test and the post-test score.

Since the value of t_{observed} was 4.596 with df (72) at the level significance (0.05) = 1.9932 the alternative hypothesis (H_a) is accepted. So, from the calculation of the data, it can be concluded that picture series with keywords significantly affected the students' achievement in writing procedure text.

B. Suggestion

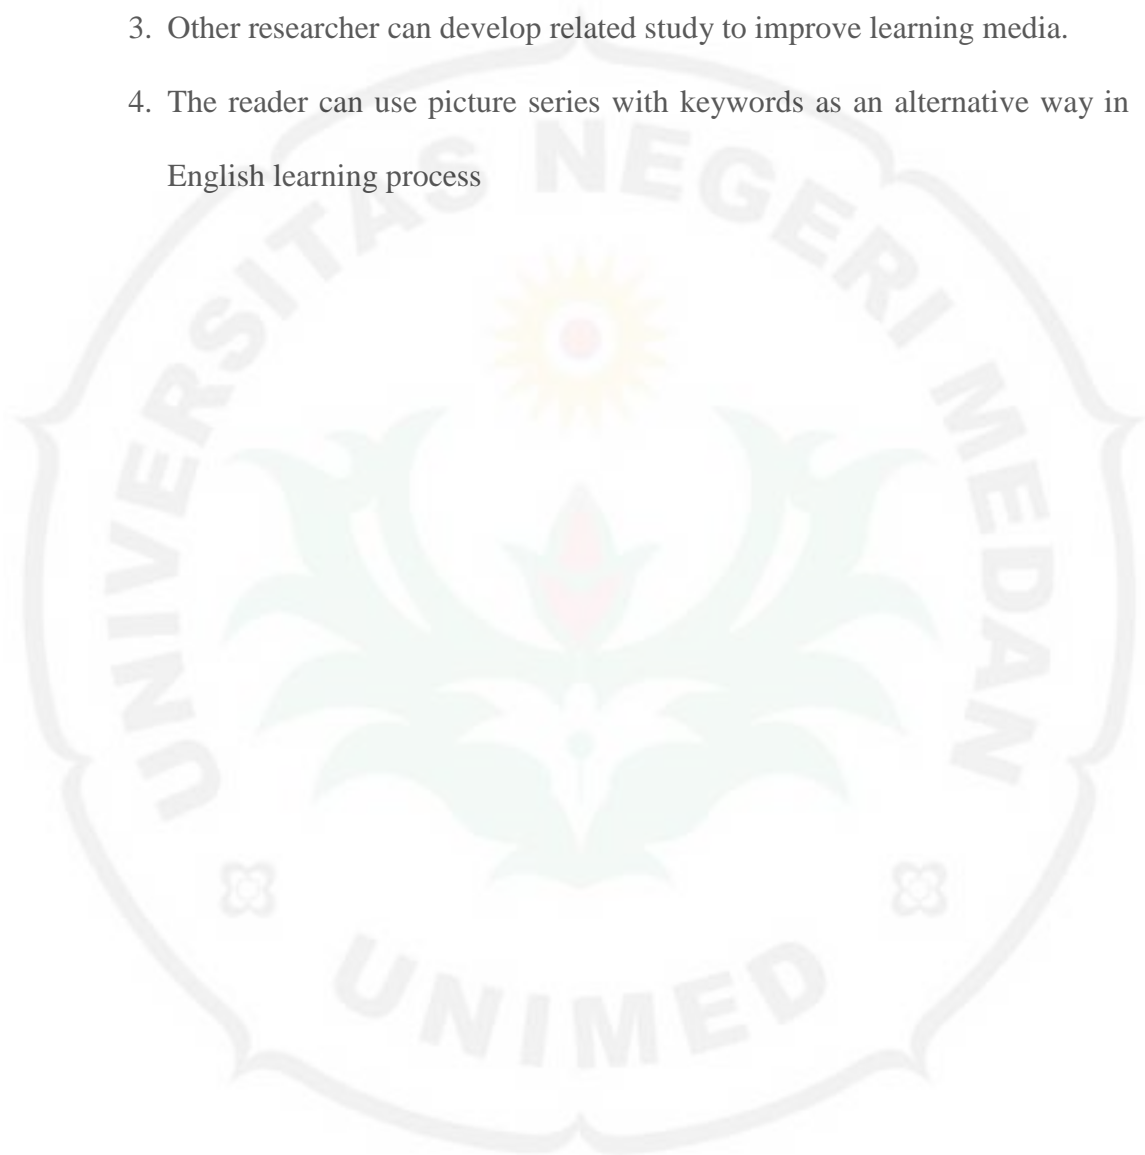

By considering the conclusion mentioned above, the writer suggests that picture series with keywords is one of the media in teaching writing, especially in writing a procedure text. The writer mentions some suggestions as follows:

1. Teachers are suggested to use an interesting media for learning activities.

Especially picture series with keywords.

2. Picture series with keyword is helpful for both teachers and students. By using picture series with picture series as media, we can attract students' attention and motivate them in learning English, especially this media is simple and easy to prepare. Students can see the real and interesting material through picture.

3. Other researcher can develop related study to improve learning media.
4. The reader can use picture series with keywords as an alternative way in English learning process
