

CHAPTER V CONCLUSION AND SUGGESTIONS

A. Conclusion

The result of calculation of t-test showed that t-observed was 3.66 with the degree of freedom (df) 70 at the level of significance (0.05). the t observed was higher than t-table 1.667 ($\alpha= 0.05$) which implies that the hypothesis is accepted.

It can be concluded that using Picture Word Inductive Model (PWIM) affects the student's achievement in writing narrative text.

B. Suggestions

The writer point out some suggestion as the following:

1. It is suggested to the English teacher to apply Picture Word Inductive Model (PWIM) because this strategy helps the students in understanding the narrative much better.
2. It is suggested to the students to use Picture Word Inductive Model in their learning to help them to express their idea.
