

CHAPTER V CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the data based on SMOG and the New Dale-Chall formula on the *Get Along with English* textbook published by Erlanga in 2010, the conclusion can be drawn as following.

Text 1 entitled *Bunaken: Breathtaking Underwater Life* gains the score 134.43 in grade 15 by using SMOG formula. It means that the text is not readable for the eleventh grade students because the text is for college students. Meanwhile by using the New Dale-Chall formula, it gains the score 8.0525 in grade 11-12. It means that the text is readable for the eleventh grade students.

Text 2 entitled *Ernest Hemingway* gains the score 89.98 in grade 12 by using SMOG formula. It means that the text is not readable for the eleventh grade students but for the twelfth students. Meanwhile by using the New Dale-hall formula, it gains the score 7.6315 in grade 9-10. It means that the text is readable for the eleventh grade students.

Text 3 entitled *Competition* gains the score 25.88 in grade 8 by using SMOG formula. It means that the text is readable for the eleventh grade students. Meanwhile by using the New Dale-Chall formula, it gains the score 5.0865 in grade 5-6. It means that the text is readable for the eleventh grade students.

Text 4 entitled *The Ways of Communicating* gets the score 85.89 in grade 12 by using SMOG formula. It means that the text is not readable for the eleventh grade students but for the twelfth students. Meanwhile by using the New Dale-

Chall formula, it gains the score 8.9655 in grade 11-12. It means that the text is not readable for the eleventh grade students but for the twelfth students.

Text 5 entitled *How to Make a Cake* gets the score 15.75 in grade 7 by using SMOG formula. It means that the text is readable for the eleventh grade students. Meanwhile by using the New Dale-Chall formula, it gains the score 5.5505 in grade 5-6. It means that the text is readable for the eleventh grade students.

Text 6 entitled *How to Make Chocolate* gets the score 53.31 in grade 10 by using SMOG formula. It means that the text is readable for the eleventh grade students. Meanwhile by using the New Dale-Chall formula, it gains the score 6.7285 in grade 7-8. It means that the text is readable for the eleventh grade students.

Based on the score of the six texts, the average can be calculated. It is 67.54 in grade 11 by using the SMOG formula. Meanwhile by using the New Dale-Chall formula, it is 7 in grade 9-10. Based on those two average scores by using the SMOG and the New Dale-Chall formula, the textbook is readable for the eleventh grade students.

B. Suggestion

Referring to the conclusion, some suggestions are offered to the English teachers, to the publishers and authors, and to the other researchers.

1. To the English Teachers

It is suggested that the teacher should check and select the textbook used for the students. Then, the teacher should understand whether the textbook is readable

for the grade of the students; so, the students will not feel bored in learning the English subject.

2. To the publishers and authors

The publishers and authors are suggested to produce the suitable textbook for the students' ability level.

3. To the other researchers

There are still many English textbooks that have not been analyzed. The other researchers which are interested in analyzing the readability of the textbook are recommended to conduct the research of the same subject but different formulas.
