

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **A. Conclusion**

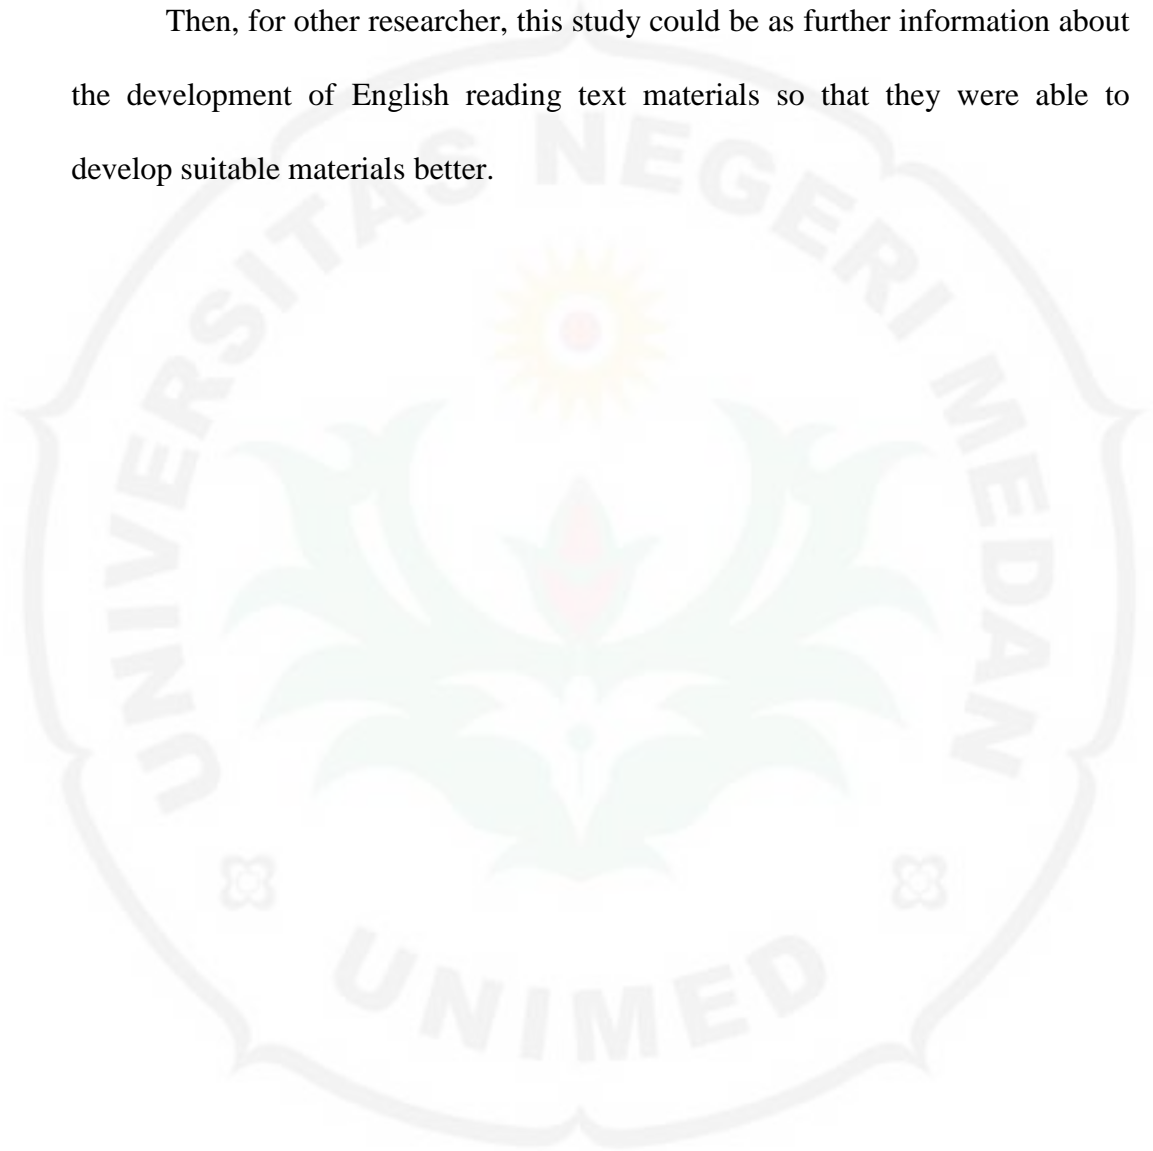

The objective of this study was to develop the suitable English reading text materials for the eighth grade students of MTs. Reading text materials focused on Descriptive text. The suitability of it, just discussed about Islamic knowledge. In this study, reading text materials were developed consisted of four Islamic texts. They were about Ka'bah, Al-Haram mosque, Quran and Hira Cave. Then, they were followed by building vocabularies, and reading comprehensions. Each of them were developed through some CBI activities proposed by Shang. Furthermore, reading text materials were validated by experts. The score gotten was 4.35, it was categorized "Very Good". It means that the development of reading text materials were suitable to the students of MTs.

#### **B. Suggestion**

In relation to the conclusion, the following suggestion was needed to be considered in conducting the related study. This suggestion was addressed for:

English teachers, as we know the materials that served by the government can not reach all the students' needs. Hopefully, teacher could use this new reading text materials as the alternative materials which are suitable for the students.

Then, for other researcher, this study could be as further information about the development of English reading text materials so that they were able to develop suitable materials better.
