

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

The students of Information Technology Program needed the specific material in reading text especially for procedure text. In this study, the problems were they studied procedure text but it was not appropriate to their major and also they needed the specific media which must make the motivation for them in doing reading materials. From the gathering data and information were started by observation of the book used in eleventh grade students of Information Technology Program in SMK Negeri 9 Medan used “Buku Bahasa Inggris” published by Kemendikbud (Kementrian Pendidikan dan Kebudayaan Republik Indonesia) in 2014. They learned about How to plant Jasmine, How to make pizzaa and How to make cheese toast.

The new reading materials were developed by using six phases of Research and Developmental (R & D), they were; 1) Gathreing Information and data, 2) Analyzing Data, 3) Designing Materials, 4) Validating by Experts, 5) Revisng, and 6) Final Product. The materials were developed based on the data of the students’ needs analysis the questionnaire , the analysis of interview from the English teachers and the existing materials.

B. Suggestions

1. Teacher

In learning English for the vocational students, the teacher should find the specific material for the students. Because they are the students who really close to the computer, use the computer as well as possible because by using computer it will motivate them to improve their skill especially in reading. The learning process can be successful if the teacher can give the materials related to the students' program and also The teacher can apply "English for Specific Purposes" approach to apply in teaching English.

2. Students

The students must be active and wise if they want to increase their ability in reading English. If they can not find the specific material from the school especially their textbook, they should utilize the internet to find the specific material.

3. Institution

In order to improve the ability of students you should use this developed material in learning process so the students will motivate.
