In relation to the conclusions, the suggestions are as follows :

1. Teacher

Teachers should consider the students' needs to choose the learning materials. The learning process can be successful if the reading materials were useful for their daily life and learning environment. The teacher should use the appropriate teaching materials based on the specific vocation which is had by the students. The teachers should develop the reading materials if they found the materials were too general for the students at SMKN 10 Medan particularly in culinary study program which had specific needs.

2. Institution

The institution should supervise the teachers and ensure them that the reading materials supported the teaching and learning process. The institution also should find the books which match to the students' needs. The number of references of English reading materials had to be increased to ease the students learning English.

3. Other researcher

Other researchers should find many references to support in developing reading materials. The questions in questionnaire should be considered to give the students' chance to deliver their wants in learning english specifically in reading skill.
