

CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

5.1. Conclusions

Based on the result of research that obtained from the result of data analysis, it can be stated some conclusion

1. Student learning outcome thought by using scientific approach student worksheet can increase student's scores in cognitive from 46.56 to 65.47.
2. The attitude of student in learning is good with percentage 72.23%.
3. The student's process skill in learning is good with percentage 74.3% in Bilingual Chemistry 2016 Class FMIPA UNIMED Academic Year of 2016/2017.

5.2. Recommendations

This research has several limitations, based on the result and conclusion above, the researcher recommendation are:

1. There is no observer which observes the researcher in conduct the scientific approach worksheet in this study, so the next researcher must do it in order to strengthen the result.
2. The next researcher should create the better worksheet in accordance with the approach and topic in study.
3. The social attitude observed in this study only limited in five aspects.
4. Time for repetition in observing attitude aspect only twice, to get the better result next researcher must do more than it.
5. There are several limitations in this study. It is advisable to do better research to achieve better results.
