

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. CONCLUSIONS

Based on the research in the tenth grade students at SMA Negeri 1 Besitang, it can be concluded that the students find it easier to write narrative text after they see the media in writing process. After the syllabus and the students' book had seen and analyzed which had the material about narrative text in the tenth grade students and see the result of need analysis, it was found that students often find the difficulty in writing process especially in arranging the story or the event, so the media that was made are helpful for them. Combining picture series and puzzle to be media is really a good way to help the students to write narrative text because the students find it easier in arranging the event in narrative text.

In general, students will be more active in the learning process if there are interesting media which will teachers' used to get the best result of transferring the material in the classroom. The average score of media validation is 85,5%. It means puzzle picture series is suitable to use in the classroom as teaching media in the learning process. Media can improve their learning interest, motivation and also their abilities in learning English especially English writing narrative text. Then the researcher expects that the developed media can be used and applied by teacher in teaching English writing narrative text in the class.

B. SUGGESTIONS

1. Teacher

For teachers, the teacher should be able to create and use an interesting way to stimulate the students in learning English, such as media. English teachers are suggested to apply media to the students in order to motivate the students to be interested in learning English, especially in writing. Because teaching media improve the students' ability and give benefits to both teachers and students.

2. Institution

Institution also has to take a part and support the developing writing media for the students. Providing appropriate media to teach is not only the teachers' duty but the school can also help the teachers and provide better media for a better learning process.

3. Other Researchers

For other researchers who are interested in this topic to conduct further studies on developing media in writing narrative text. The other researchers are able to use this research as references, especially in the field of developing song media.
