CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The teaching media was developed by considering the learner needs and teacher needs then revised the teaching media by validators so the researcher conducted the media as new teaching media that appropriate for the students and teacher needs. It was designed a set of kits included hardware and software. There were some hardware units in the teaching media, they were 8 characters of wayang and three background of the situations such as in the school, in the gass station, in the public road, they were packaged on a lapbook. The other was software units consisted of three dialogue script, an example video and the instruction were packaged on an instructional book.

B. Suggestions

The suggestions were given to have both theoretical and practical constributions:

1. Theoretically, the findings of this study were expanded and enriched the reference which related the field on how to develop teaching media to teach speaking ability in analytical exposition text for Senior High School students.

2. Practically, the finding of this study was usefull for the English teacher, as a source to develop the media which was suitable for the students.
