

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

In this chapter the writer gives conclusion and suggestions based on the previous chapter that have been discussed.

.5.1. CONCLUSIONS

To avoid the distinction or dying, TBL must be saved by putting the language down on paper . It must be documented or recorded so that the people can gain the materials about the language that can be studied again for the sake of developing it, As we know the loss of a language is the loss of culture, characteristics, the way of life and everything about Batak Tribe. No TBL no Batak Tribe.

One way to know the language is to study its vocabulary that can be also known from derivational affixes, the study of Noun Verb, Adjective formations for instance. Therefore the study verbal affixes in TBL is also recapitulate TBL for its future from the side of Morphology, the study of morphemes and their arrangement in word formation. Affixations is the process of attaching an affix to another morpheme(the root or stem)to a larger word. It can change the function of word after affixes addition. Affixation can be in verbal affixes, Noun affixes and, adjective affixes.

Affixes added to front of the base word is called prefixes, in the middle it is called infix and at the end of the base word is called suffix.

There are differences between verbal affixes in and in TBL. The number of verbal prefixes in TBL is more than in English. There is no any verbal infixes in English, while

in TBL we have four as seen in the previous chapter. On the other hand the number verbal suffixes in English is more than TBL (see chapter IV).

2, SUGGESTIONS

- It is hoped that TBL should be aware that is going to be in distinction because its users and speakers are less and less in number. It means the characteristics, culture, the way of life Batak tribe will be lost and at last the tribe itself. It will be danger in future.
- TBL should be saved from dying or danger by putting the language down on paper . It is documented and recorded so that the people can find the materials of the TBL language to be studied or taught for the sake of enlivening the language.
- The research of TBL should be continuously be done in different aspects so that it is clearer for us to understand it later on..
- The TBL can be more well developed if we write it or put it in books that can be read by the people of Batak tribe.
- The comparative study between TBL and other languages for instance Indonesian .is also very helpful to enliven it.
- We are the people of Batak tribe should be aware of these sayings;

If we lost our money we can look for it. If our house was on fire, we can build it again . But if we lost our language (TBL), everything is lost especially Batak people.
