

CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

Based on the research findings that presented in the previous chapter, there were some important points that can be concluded, they were:

1. The attitude of Rohingya teenagers in Medan realized in three ways, such as: they use Rohingya language at home, they use Rohingya language in friendship domain and they use Rohingya language at religion domain. Eventhough not all of the Rohingya teenagers use Rohingya language, it because they live in Indonesian area.
2. There are three factors that underlie the positive attitude towards the use of Rohingya language, namely language loyalty, language pride, they are proud and make the Rohingya language as their identity and language awareness of norm.

5.2 Suggestion

Related to the conclusion of the study, suggestions are staged as the following:

1. It is suggested that the other researcher conduct the research in longer time, so they can get better result.
2. It is suggested that the Rohingya teenagers should use Rohingya language at home, so the young generation or the children will speak the Rohingya language

3. After read this study, hopefully the Rohingya people in Medan should have positive language attitude relate to the characters of language attitude, so they can maintain the Rohingya language and keep it becomes an exist language.
