CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

Based on the need analysis from the questionnaire and the interview, it is concluded that the students of the Computer and Network Engineering program in Grade XI at SMK Dharma Bakti 1 Medan need the appropriate English writing materials particularly procedure text when they do something related to computer and network. The English writing material was developed in order to increase their ability about procedure text and learn new vocabulary related to their major. Then, students know about kinds of thing in their field which can support their job in the future.

The English writing materials were developed by using six phases of Research and Development (R & D, they were; 1) gathering information and data, 2) analyzing data, 3) designing new material, 4) validating new material, 5) revising new material, 6) revised-developing new material (final product).

B. Suggestions

1. Teachers

Teachers should consider students' needs in choosing the learning materials. The learning process can be successful if the teacher can give the materials related to the students' program and also the teacher can apply "English for Specific Purposes" approach to apply in teaching English for vocational high school students.

2. Students

Students can find the materials related to their study program from the internet and the other books, if the existing materials provided are not appropriate to Computer and Network Engineering study program. So, the students can learn with the appropriate materials especially in English subject.

3. Other Researchers

Other researchers should find many references to support in developing writing materials. The better developed materials can make the comprehension of the students increase and better too.
