

## LIST OF FIGURE

	Page
Figure 2.1 Benefit of Virtual Laboratory	15
Figure 2.2 The Inside Scenario of VCL	17
Figure 2.3 Simulation of an Experiment	17
Figure 2.4 Three Level of Intertextuality of Chemistry	18
Figure 2.5 Particles of NaCl Solubility	22
Figure 2.6 Particles of $\text{Ca}(\text{OH})_2$ Solution is added by NaOH solution	25
Figure 2.7 Particles of $\text{CaCO}_3$ added by Strong Acid	28
Figure 2.8 Particles of $\text{AgNO}_3$ solution added by NaCl Solution	29
Figure 2.9 Thinking Framework Flow	33
Figure 3.1 Research Flow Diagram	37
Figure 3.2 Try Out Procedure of Virtual Chemistry Laboratory to Student	39
Figure 4.1 Average Assessment Media by Expert and Chemistry Teacher	60
Figure 4.2 Graph of Average Value of Pretest and Post Test in Experiment and Control Class	63
Figure 4.3 Graph of Normalized Gain Experiment class and Control Class	63
Figure 4.4 Graph of Average Value of Student Understanding of Sub-microscopic Level in Experiment class and Control Class	64
Figure 4.5 Graph of Average Value of Student Activity in Experiment Class and Control Class	65
