ABSTRAK

Penelitian ini bertujuan untuk mengetahui adanya pengaruh penggunaan model pembelajaran kooperatif tipe jigsaw terhadap kemampuan kognitif dan kreativitas ilmiah siswa pada materi keanekaragaman hayati di kelas X SMA Negeri 2 Lubuk Pakam tahun ajaran 2018/2019. Populasi dalam penelitian ini sebanyak 324 orang. Sampel penelitian diperoleh dengan teknik *purposive sampling*. Sampel penelitian yaitu kelas X Mia 2 dan X Mia 5. Hasil penelitian menunjukkan kemampuan kognitif kelas eksperimen sebesar 81,072 ($SD= 7,44$) dan kelas kontrol sebesar 70,05 ($SD= 9,30$) sedangkan nilai kreativitas ilmiah kelas eksperimen sebesar 7,095 ($SD= 1,56$) dan kelas kontrol sebesar 5,059 ($SD= 1,279$). Jadi, dapat disimpulkan bahwa ada pengaruh penggunaan model pembelajaran kooperatif tipe jigsaw terhadap kemampuan kognitif dan kreativitas ilmiah siswa pada materi keanekaragaman hayati di kelas X SMA Negeri 2 Lubuk Pakam tahun ajaran 2018/2019. Hasil ini menunjukkan pentingnya penggunaan model pembelajaran kooperatif tipe jigsaw untuk mencapai kemampuan kognitif dan kreativitas ilmiah yang lebih tinggi pada materi keanekaragaman hayati.

Kata Kunci: Jigsaw, Kemampuan Kognitif, Kreativitas Ilmiah, Keanekaragaman hayati.

The Effect of Cooperative Learning Model Using Jigsaw Type in Cognitive Abilities and Scientific Creativity of Students on Biodiversity Material in Class X of SMAN 2 LubukPakam in the 2018/2019 Academic Year

ABSTRACT

This study aims to determined the effect of the use of jigsaw cooperative learning models on cognitive abilities and scientific creativity of students on biodiversity material in class X of SMA Negeri 2 LubukPakam in the 2018/2019 academic year. The population in this research were 324 people. The research sample was obtained by purposive sampling technique. The research sample was class X Mia 2 and X Mia 5. The results showed that the cognitive abilities of the experimental class were 81,072 ($SD = 7,44$) and the control class was 70,05 ($SD = 9,30$) while the value of experimental class creativity was 7,095 ($SD = 1.56$) and the control class is 5.059 ($SD = 1.279$). So, it can be concluded that there is an influence of the use of jigsaw cooperative learning model on cognitive abilities and scientific creativity of students on biodiversity material in class X of SMA Negeri 2 LubukPakam in 2018/2019 academic year. These results indicated the importance of using jigsaw cooperative learning models to achieve higher cognitive abilities and scientific creativity on biodiversity material.
