The use of Pop-up Book media would be more effective if teachers are using this media bring the story recount with more creative and communicative as the essence of Pop-up Book media utilization was an intermediary of communication between the storyteller and the listener. With higher creativity and more intense communication, the media not only serves to recount story to students, but also to motivate and provide higher confidence of the students to use English more frequently in daily conversation. And for other researcher, this media consist of one story as the material; the story from Islamic story is the story of Prophet Ibrahim. For other research can be adding another story as the material for Pop-up Book media.
