

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusions

Based on the results of the development obtained, it can be concluded as follows:

1. The dictionary is designed based on the *Kamus Kosakata Budaya Jambi* from the Jambi Provincial Library and several *Tumenggung* as native speakers of the *Suku Anak Dalam* language. This product contains material about lists of words/terms in *Suku Anak Dalam* language which are then translated into Indonesia language. The number of words/terms obtained is 298 that consist of some word classes and several other lexical terms that are formed in proverbs and phrases.
2. The product that has been designed was declared suitable for use. The total overall score of validation is 80. Based on the standards and parameters of validating the product, this product belongs to the good category. This application product can be downloaded free by all android smartphone users. The android-based culture dictionary application designed as a tool makes it easy to find lexical items of *Suku Anak Dalam* Language.

5.2 Suggestions

In making the application of the *Kamus Kosakata Bahasa Suku Anak Dalam*, the researcher realized that there were some deficiencies in making this application that must be perfected. Therefore researchers hope for users to correct these deficiencies or add to the advantages of this application so that it can be more useful for all users. From the results of the development that has been produced, there are several suggestions that:

1. To the language practitioners or linguists – this study can make easy to access cultural dictionaries, so they can be applied in learning.
2. To the Department of Applied English Linguistics students – this study can be used as reference to do educational research and development.
3. To other researcher – it is suggested that this study could be further expanded, elaborated and explored in other field as well as in linguistics field, in order to contribute the development of educational research and development.
4. To other developer - It needs to be developed again so that the application can run not only on android smartphone but on other smartphones such as Iphone or Ios. The need for additional features such as phonetic transcription, pictures and pronunciation that can be done by users in the next development.
