

PREFACE

Praise to God Almighty for His blessing in everything everlasting. This undergraduate thesis is a partial requirement of fulfillment after finishing a set of subjects in four year in State University of Medan, however, consciously, not the last of learning process in life. Despite of a serious effort, it has been written under the blessing of God Almighty, who I believed in Jesus Christ, who never superstitious to me, who accompany every step in life, including in education.

During the process of the writing of this thesis, I am indebted for everyone surrounding, for none in the writing process can be done without the involvement of them. Special thanks to Prof. Dr. Bornok Sinaga, M.Pd as thesis supervisor, Budi Halomoan Siregar, S.Pd., M.Sc., Drs. M. Panjaitan, M.Pd., and Prof. Dr. Edi Syahputra, M.Pd as examiners; Dr. Martina Restuati, M.Si., Prof. Dr. Herbert Sipahutar, M.Sc.; Dr. Edy Surya, M.Si., and Drs. Yasifati Hia, M.Si.; Dr. Iis Siti Jahro, M.Si.; all of lecturer in State University of Medan, especially, who teaches in Bilingual Mathematics Education 2014 and all staff of administration; Dr. E. Elvis Napitupulu, M.S., as Academic Supervisor; all who have given astonishing service, care, and respect.

A special word of gratitude goes to my beloved parents, Bintan Manurung and Lamtiar Simanungkalit who encouraged me during the past four years to overcome my hesitation to finish my study and generous my financial support all the years, who believe me when others don't, who pray days and nights, who always work hard and hardly to remind me about everything is going to be alright, you are truly a piece of heaven on earth (mauliate godang among-inong); my elder brother, Wido Dhipardo Manurung, my beauty sister, Ahyuli Nelsy Manurung and my love my younger brother, Steven Jonathan Manurung, who treat me better, who care of me, who play with me while I am boring, who understand me in difficult thing when the others don't; my beloved grandparents Oppung Torang who always remind me to be a good

person, who always treat me as a good granddaughter, who always appreciate me about my achievement since SD until now.

Honestly, I cannot be written my thesis without the help of Bilingual Family in State University of Medan: Mathematics Education, Physics Education, Chemistry Education and Biology Education, for sharing and discussion, and friendship. Special thanks to my unforgotten weird friends in 4 years in Bilmath'14 Class, Sarah Uly Manullang, Ruth Frida Sihotang, and Rimma Kurniawati Siagian, who never let me go down, who help me all the time, who always make me laugh, who always make me to do stupidity, who do the extreme things together. I also want to thank Chrystin, Yessica, Jupiter, Lasma, Victor, Thomson, Ati, Nova, Gaya, Lenny and all bilmath'14 members who always support me; thanks to IKBKM family; thanks to Warga in Sekret, Ade, Frengki, Lastiar, Meliana, and Yuni who always cheer me in the midnight to finish my thesis; thanks to my teamwork Rafles Sinaga, Wes Waruwu, and Fitri Meliona who give many directions, loves, friendships together with team SIMAK Akbar. You help my thanks guys.

I realize that my thesis would be impossible perfect because it has its own advantages and limitations. Building critics and suggestions are needed to improve the quality for this thesis. The best wish is that this thesis is useful for those who use this thesis now and future.
