

## CHAPTER V CONCLUSIONS AND SUGGESTIONS

### 5.1. Conclusions

This According to the results obtained from the results of data analysis it can be concluded as follows:

1. The students of grade VIII SMP Negeri 3 Percut Sei Tuan, Deli Serdang experiencing learning difficulty in the Digestive System on Human lesson material. The questions in the category C6 (63.8) has the highest difficulty level and the C1 has the lowest level (29.37). The other categories (C2, C3, C4, and C5) are fallen into medium category.
2. The most difficult indicator for the students of grade VIII SMP Negeri 3 Percut Sei Tuan, Deli Serdang is the indicator 1 and 4 (61.81% and 64.37% respectively). The content of indicator 1 is *“examples of digestive system abnormality and diseases and are commonly found on daily activity, and how to deal with them”*. The content of indicator 4 is *“To differentiate between the digestive ducts and glands in the human digestive system”*.
3. Interest, motivation, lesson material are factors which affect the learning difficulty of in the Digestive System on Human lesson material with the category “take effect”. Whereas the teacher factor has less effect and is categorised as “quite influential”.

### 5.2. Suggestions

This research is limited to several things. There are some suggestions to make:

1. The research is more challenging for further study when more factors (external and internal) will be included.
2. The effects of factors affecting student's learning difficulty will be more obvious when the teacher (teaching style and methods) and lesson material are observed and studied more thoroughly.
