

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusions

After analyzing the types of questions based on the reseach findings and discussion in the previous chapter, it could be drown the conclusion as follows:

1. The students used referential and display questions in the classroom. The referential question is mostly used by the students. It was found that 61% of question used by the students were referential question.
2. The factors that can affect students questioning are consisted of Personal factors such as affraid of making mistakes and self-esteem, social factor , the material that difficult to understand or unlikely interesting and the image the of the teacher.

#### B. Suggestions

Based on the conclusion described above, the reseacher would give some suggestions as the following :

1. For the teachers: The teachers should create good interactions with the students to reduce the factors of students' questioning.
2. For further research : The findings of this research can be used as reference to give better understanding for the future research, the next reseacher may provide the additional information and comparison that might be relevant to the study.
