CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The data clearly indicate that besides interpersonal relationship,context has a substantial effect on the choices of terms of address, both in Pesisir Barus. A number of factors such as who, whem, where, to whomthe form is used, and with what kind of intentions have a significant influence. Therefore, the choice of term of addresscannot be determined without considering the concrete context in which the address forms are used.

Based on data and data analysis in chapter IV about terms of address by pesisir barus community. The first conclusion is concerned with kinds of the terms of address by Pesisir Barus Community.the second conclusion is related to factors and function that influenced the terms of address by Pesisir Barus Community, as follows:

1. There are six kinds of the terms of address by wardaugh's theory they are first name (FN), title plus last name (TLN), title (T), last name (LN), pet name (PN), and kinship term (KT), from six kinds, there were six kinds they were, FN, PN, MT, RT, KT, IT. With the total kinds of address terms used by Pesisir Barus Community in interviewing are 151 data. The most dominant kinds the terns of address are used by Pesisir Barus community is RT (61 times), the most dominant rarely used by Pesisir Barus community is KT (56 times), PN (16 times), FN (11 times), and MT (2 times), IT (2 times) is seldom used by Pesisir Barus

Community. So it means that community in there more used terms of address RT and KT for daily use.

2. There are four kinds factors and function of the terns of address in Pesisir Barus Community can be divided as G (Gender), A (Age), FR (Family Relationship). R (Respect). With the total factors of address terms used by Pesisir Barus Community was analysis G(27 times), A (28 times), FR (36 times), R (60 times) . it means that all factors were used by Pesisir Barus Community, and then based on the data, factor and function that influenced of Pesisir Barus Community is usually R and FR or by the relatives in there.

The data from the two selected interviewing in society that interpersonal relationship and context are four the important factors that determine the choices of address terms among Pesisir Barus speaker. In other words, the employment of a proper address form is affected by sociolinguistics elements such as age, gender, personality, social status, social distance, degree of respect, familiarity, family relationship and intimacy between the addresser and the addressee.

The result of this study will benefit the linguistic communities in particular Pesisir Barus language learners by providing an in depth understanding of the current usage of Pesisir Barus second person address terms.

B. Suggestions

After collected and analyzed the data about Terms of Address in North Sumatera, some suggestion are given as follows:

1. The researcher suggest to reader and student who want to know about Pesisir language and culture, especially Barus community who doesn't know about Pesisir Barus language anymore, it is be better to learn through because very interesting and unique start from kinds and used name for women and men because the language almost similar with Minangkabau language.

2. It is suggested that the reader of this thesis is important to know what kinds of the terms of address are used by Pesisir Barus Community and what factors and functions influenced the terms of address by Pesisir Barus Community, and also how the different used terms of address in each person between women and men. especially in Community Barus.

3. For further researchers, who wants to use of address terms usage as the object of the researher or for researcher who wants to analyze of addressterms from different perspective. Terms of address can be found in every language, it's not only PesisirBarus language but also the other language in each area.
