

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

After gaining the data and analyzing its components, the conclusion are drawn that the worksheet used by the teacher for tenth grade students at SMA Dharma Pancasila Medan are not interesting and are not effective to fulfill students and learning needs because there have no specific worksheet for reading comprehension in the school. Students also face problems in comprihending Descriptive reading text. They find out the difficulties in reading a Descriptive text such as, half of the students lack of understanding the vocabularies in the text, therefore they can not comprehend the text well. They actually need an attractive worksheet which can attract and stimulate them in reading comprehension and add more their vocabularies. An innovative worksheet is needed to be developed based on their needs. By following the R&D cycle proposed by Borg and Gall (2003), this study is aimed to develop students worksheet for reading comprehension of desriptive text by using Kahoot! as the platform software to design an interesting worksheet. By following the six steps of research and development such as gathering data and information, need analysis, media design, validating to experts, revision, and final product; the recommended worksheet is developed for the tenth grade students in reading descriptive text. The average score of validation in terms content aspect is 94.2%, the presentation aspect is 94%, the language aspect is 97% and the graphic aspect is 100%. The average worksheet score is 96.3% which is categorized as *very good*. Based on this

percentage, it can be concluded that the developing students worksheet for reading comprehension by using Kahoot! are appropriate for tenth grade students of SMA Dharma Pancasila Medan.

## **B. Suggestions**

In teaching and learning process, the teachers should be aware to students worksheet. Because it is one of the components in teaching learning process that important to know the understanding of the students about the material or topic related to students' surroundings in order to learn better. The teachers can use a lot of tools to develop interesting and innovative worksheet. In this case, a worksheet that is developed by using Kahoot!. However, teacher can combine it with certain techniques or strategies in order to support the students achieve their goal in English, particularly in the reading skill.
