

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

Based on the results of the research and discussion that has described, it can conclude that:

1. The result from validation that Material expert is 85% in “Very sufficient” category.
2. The result from validation that Curriculum and learning expert is 93.3% in “Very sufficient” category.
3. The result from validation that design expert is 80% in “Very sufficient” category.
4. The result of teacher validation is 90% in “very sufficient” and students response 83.29% in “Good” category
5. The coursebook feasible to used in teaching in learning process.

5.2. Suggestion

Suggestion that can be recommended in this research is necessary for the development of a research instrument by scientific approach and related to the immune system, and then the application and the material of the coursebook must be integrated so that the readers can easy to understand the coursebook.

This research is recommended to continue until the disseminate stage and use more research objects to find out the effectiveness of the coursebook, by using a larger research scale of this product that expected to get the better coursebook.
