

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research in the 11th grade students at SMA Negeri 1 Tigapanah, it can be concluded that the students were interested in the technique by implementing brainstorming technique and the students were easier to speak due to give their opinion. So, the technique made by researcher is useful for the students in speaking. Using brainstorming technique is a good way to attract students' imagination and thinking skills, thus they can convey their opinion and idea into a good structure to speak. The researcher used the technique by implementing media because it is appropriate technique that can be applied in the class.

Based on some experts' theory about the effectiveness technique of brainstorming in teaching learning process, it is said this is an interesting technique that teachers can apply in transferring material in classroom. So, in this research the creative technique helped the students to understand the topic. Then, the researcher expects that the technique will be used by others teachers in teaching learning process.

B. Suggestion

By considering the conclusions mentioned above, the researcher suggested that brainstorming technique is useful in teaching learning process, especially in the class which can not apply other technologically technique. The researcher mentions some suggestions as follow:

1. To other researchers, to develop brainstorming technique in teaching speaking because the researcher proved that this technique could stimulate the students to enrich their idea.
2. To other English teachers, to apply brainstorming technique as one of the alternative ways to enhance students' ability in speaking.
