

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the analysis and the calculation that has been done above, so the conclusion are as follows:

1. The analysis of School Textbook based on BSNP criteria is quite valid and didn't need to be revised.
2. The development of innovative ebook added some elements.
3. The innovative e-book on reaction rate material is accordance with BSNP criteria.
4. Student motivation that use innovative e-book is higher than use of school textbook.
5. Student learning outcome that use innovative e-book is higher than use of school textbook.

5.2 Suggestion

Based on the result and conclusion above, the researcher has some suggestion:

1. For the chemistry teacher can use the innovative e-book to study the reaction rate material so the other student can be motivated and improve the learning outcome.
2. For the future research who also want to research the same thing, are expected to choose other material with more innovation and more up to date material, and also adjust to technological development.
