

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter discusses about conclusion and suggestion of the research findings and discussion presented in the previous chapter.

A. Conclusion

After analyzing the data gotten from interview and questionnaires results of English teacher and students at SMP Negeri 2 Gebang, the researcher draws the conclusion:

1. The students are lack of motivation since they are not interested in the teaching and learning process because of the unchangeable method from the teacher. The researcher found earlier that the teacher used lecturing method and only used book from government. Another problem is students did not understand what the teacher has explained. In addition, there is no media used. Therefore, it is difficult to speak and make a procedure text which eventually brings them to be passive learners. They want to have the interesting and effective media which motivate them to learn and speak about procedure text. The solution for them is developing the new speaking media.
2. Developing media by using Windows Movie Maker follow the R & D phases by Borg and Gall (2003) which is simplified into, (1) Gathering Data and Information; (2) Need Analysis; (3) Design Media; (4) Validate by expert; (5)

Revision; (6) Final Product. The score of validation from the validators was 92.7% and it was categorized as relevant. It means that the media were valid and appropriate to use as learning media of speaking procedure text for the ninth grade students at SMP Negeri 2 Gebang.

B. Suggestion

There were some suggestion given for the consideration the future.

1. For the teacher, teacher should consider the students' needs in choosing the learning media to support learning process. The learning process can be successful if the teacher mastered in explaining the procedure text as well as using a learning media that can support them. Since the students must master speaking skill that consider the idea, grammar, pronunciation, and also the teacher should find an appropriate learning media in improving their skill and motivating them in learning English. Then, the teacher also should pay attention to kind of text that will be given to the students. For this reason, a procedure text about food recipe is really suitable for the teacher to be used in the class, because it represented the daily life experience of the students better than others text given.
2. For the students, they can use the Windows Movie Maker as a media for them to be used in speaking procedure text. For the next research and development, the testing should be conducted when the students were studying about speaking procedure text in order to get the evaluation more accurately.
