Weldy A.A Siahaan, NIM 7133141118. Pengaruh Kondisi Ekonomi Orang Tua dan Lingkungan Sosial Terhadap Minat Melanjutkan Studi S-2 Mahasiswa Angkatan 2016 Program Studi Pendidikan Ekonomi Fakultas Ekonomi Universitas Negeri Medan. Skripsi, Jurusan Ekonomi, Program Studi Pendidikan Ekonomi, Universitas Negeri Medan 2019.

Masalah dalam penelitian ini adalah apakah ada pengaruh antara kondisi ekonomi orang tua dan lingkungan sosial terhadap minat melanjutkan studi S-2 mahasiswa.

Penelitian ini dilakukan di Fakultas Ekonomi Universitas Negeri Medan, yang beralamat di Jalan Willem Iskandar Pasar V Medan Estate. Populasi dalam penelitian ini mahasiswa program studi Pendidikan Ekonomi, Jurusan Pendidikan Ekonomi, Universitas Negeri Medan yang berjumlah 141 orang dan sampel berjumlah 35 orang. Teknik Pengumpulan data dalam penelitian ini menggunakan observasi, dokumentasi, dan kuesioner.

Dari hasil analisis uji linearitas, diperoleh antara kondisi ekonomi orang tua terhadap minat melanjutkan studi S-2 adalah sebesar $0,492 > 0,05$ dan linearitas lingkungan sosial terhadap minat melanjutkan studi S-2 adalah sebesar $0,279 > 0,05$. Hal ini menunjukkan bahwa ada pengaruh antara kondisi ekonomi orang tua terhadap minat melanjutkan studi S-2 dan lingkungan sosial terhadap minat melanjutkan studi S-2 mahasiswa angkatan 2016 Program Studi Pendidikan Ekonomi Fakultas Ekonomi Universitas Negeri Medan.

Dari hasil perhitungan uji t diperoleh pengaruh kondisi ekonomi orang tua (X_1) dengan minat melanjutkan studi S-2 (Y) adalah $5,498 > 1,692$ ($t_{hitung} > t_{tabel}$) dan untuk pengaruh lingkungan sosial (X_2) dengan minat melanjutkan studi S-2 (Y) diperoleh $2,867 > 1,692$ ($t_{hitung} > t_{tabel}$). Dengan demikian dapat disimpulkan bahwa ada pengaruh yang positif dan signifikan antara kondisi ekonomi orang tua terhadap minat melanjutkan studi S-2 dan pengaruh yang positif dan signifikan antara lingkungan sosial terhadap minat melanjutkan studi S-2 mahasiswa angkatan 2016 Program Studi Pendidikan Ekonomi Fakultas Ekonomi Universitas Negeri Medan.

Dari hasil perhitungan uji F diperoleh adanya pengaruh secara simultan antara kondisi ekonomi orang tua (X_1) dan lingkungan sosial (X_2) terhadap minat melanjutkan studi S-2 (Y) yaitu sebesar $16,104 > 3,28$ ($f_{hitung} > f_{tabel}$). Dengan demikian dapat disimpulkan bahwa ada pengaruh positif dan signifikan antara kondisi ekonomi orang tua dan lingkungan sosial terhadap minat melanjutkan studi S-2 mahasiswa angkatan 2016 program studi pendidikan ekonomi fakultas ekonomi Universitas Negeri Medan.

Kata Kunci : Kondisi Ekonomi Orang Tua, Lingkungan Sosial , Minat Melanjutkan Studi S-2

ABSTRACT

Weldy A.A Siahaan, NIM 7133141118. The Influence of the Economic Conditions of Parents and Social Environments on Interest in Continuing the S-2 Study of Class 2016 Students of the Economic Education Study Program, Faculty of Economics, State University of Medan. Thesis, Department of Economics, Economic Education Study Program, Medan State University 2019.

The problem in this study is whether there is an influence between the economic conditions of parents and social environment on the interest in continuing the study of S-2 students.

This research was conducted at the Faculty of Economics, Medan State University, which is located at Jalan Wilem Iskandar Pasar V Medan Estate. The population in this study were students of the Economic Education study program, Department of Economic Education, Medan State University with a total of 141 people and a sample of 35 people. Data collection techniques in this study using observation, documentation, and questionnaires.

From the results of the analysis of linearity test, obtained between the economic conditions of parents of interest in continuing the study of S2 is $0.492 > 0.05$ and the linearity of the social environment towards the interest in continuing to study S2 is $0.279 > 0.05$. This shows that there is an influence between the economic conditions of parents on the interest in continuing their Masters degree and the social environment on the interest in continuing their Masters degree in the 2016 class of Economic Education Study Program, Faculty of Economics, State University of Medan.

From the results of the t test calculations obtained the influence of economic conditions of parents (X_1) with an interest in continuing the study of S-2 (Y) is $5.498 > 1.692$ ($t_{count} > t_{table}$) and for the influence of social responsibility (X_2) with an interest in continuing the study of S-2 (Y) obtained $2.867 > 1.692$ ($t_{count} > t_{table}$). Thus it can be concluded that there is a positive and significant influence between the economic conditions of parents on the interest in continuing to study Master's degree and a positive and significant effect on the social environment on interest in continuing to study S2 students of the 2016 Class of Economic Education Study Program, Faculty of Economics, State University of Medan.

From the results of the F test calculations obtained the simultaneous influence between the economic conditions of parents (X_1) and social environment (X_2) on the interest in continuing the S-2 (Y) study in the amount of $16,104 > 3.28$ ($f_{count} > f_{tabel}$). Thus it can be concluded that there is a positive and significant influence between the economic conditions of parents and social environment on the interest in continuing the study of S2 students in the 2016 class of economic education courses at the State University of Medan.

Keywords: Economic Conditions of Parents, Social Environment, Interest in Continuing S-2 Study
