

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

Based on the research, we can concluded :

1. Existing student worksheets are not very interesting
2. Student worksheet based android was proper according to the validation of lecturers and teachers. Media validation score was 3,72 of 4 while for material validation score was 3,75 of 4.
3. Student outcomes in experiment class that used student worksheet based android was higher than control class that used their student worksheet.
4. The student motivation in experiment class categorized as very good while in control class was good.

5.2 Suggestion

Based on research, it has some suggestion:

1. For Teacher

Chemistry teacher expected to apply the student worksheet based android on salt hydrolysis topic in the learning process to increase student outcomes.

2. For School

In order to provide another media based on technology information to support teaching and learning in classroom.

3. For Researcher

The next researcher, if you want to do further research it is recommend to do the research in other topic and with different variations so it can increase student outcome in other topic.
