

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the research, we can concluded :

1. Student worksheet based android was proper according to the validation of lecturers and teachers. Media validation score was 3,775 of 4 while for material validation score was 3,765 of 4.
2. Student outcomes in experiment class that used student worksheet based android was higher than control class that used their student worksheet.
3. The student motivation in experiment class categorized as very good while in control class was good.

5.2 Suggestion

Based on the conclusion and suggestion above, the researcher suggest

1. Chemistry teacher expected to apply the student worksheet based android on salt hydrolysis topic in the learning process to increase student outcomes.
2. The next researcher, if you want to do further research it is recommend to do the research in other topic and with different variations so it can increase student outcome in other topic.
