

CHAPTER V

CONCLUSIONS AND RECOMMENDATION

5.1 Conclusions

Based on the results of the research that has been done, the following conclusions are obtained:

1. That there are difference in learning outcomes of students taught using media video learning and visual image media, because the score in the video class is higher than visual image class on Tissue Culture in Grade XI IPA SMA Negeri 5 Medan Academic Year 2018/2019.
2. The retention of students taught using media video learning is longer than using visual image media, because in the video class students are more active than visual image class on Tissue Culture in Grade XI IPA SMA Negeri 5 Medan Academic Year 2018/2019.

5.2 Recommendation

Based on the results and conclusions of the study, the researcher puts forward some recommendation as follows:

1. For students and other researchers who want to develop further research in order to better design a strategy that can maximize the learning abilities that exist in each student.
2. For the next researchers takes a long time in this study to get satisfying results and added the control class as a comparison of data with the media class.
