Thu, Nov 22, 2018 at 12:51 AM

Dear Novita Sari

Thank you for submitting your manuscript:

✓ **The Effect of Red-fleshed Pitaya (*Hylocereus polyrhizus*) on Heat Shock Protein 70 (HSP70) Expression and Cortisol in Rats The Induced Strenuous Exercise**

Novita Sari Harahap *et al.*

Funders: you have stated during the submission process that this work has been funded by:
Kementerian Riset Teknologi Dan Pendidikan Tinggi Republik Indonesia (027/UN33.8/LL/2018)

WHAT WE DO NEXT

Before accepting your article: we will check content suitability, readability and manuscript format; adherence to ethical standards for the type of study; that the underlying data have been supplied (where appropriate); and that there is sufficient detail to enable others to replicate the study (if applicable).

Before publishing your article: if we accept your article, we will be in touch in the next two or three working days with any issues that need addressing. You will then receive a final proof of your article for approval, prior to publication.

WHAT YOU NEED TO DO NEXT

Before doing anything else, we need you to suggest **at least 5** suitable referees to peer review your manuscript following publication (in accordance with our publishing model), should it be accepted. We will need these names before we can publish the article so we recommend identifying them now via the MY REFEREES page for this article. You can also access this page via the article's record at My Research >> My Submissions.

Please quote the article number 17206 in any correspondence.

Kind regards

The F1000Research Team

Dear Novita,

Thank you for your patience with the submission process. We have undertaken an initial check of your article and we have noticed that the article is unclear in places, making it difficult to assess the content. In order to improve flow and readability, we suggest that you reword any unclear sections.

Therefore, we would strongly suggest that the article is copyedited, either by a native English speaker or a professional copyediting service. There are many copyediting services available, but if you would like a list, we can provide some suggestions. However, please note that we do not have any arrangements with them, and are not able to guarantee the quality of their service.

In addition, we noticed that there may be some information missing from your manuscript; F1000Research endorses the ARRIVE guidelines for reporting animal studies. The ARRIVE checklist is especially helpful to make sure that all relevant information is recorded. Our research article guidelines may also be useful.

Best regards,

James

Dear Editor of f1000research

✓ Thank you for the initial checking of our article. We really eager to continue to publish in f1000research. However, we are asking more time to finish the review of our paper for several comments and suggestion addressed to it.

We are trying to send the review result by next week. Hope you will still consider it.

Best Regards
Novita Sari Harahap

Dear Novita Sari,

Further to your email on 7/12, I wanted to check if you would still like to continue with your submission. I would appreciate if you could confirm receipt of this email, and respond to our outstanding comments.

We have undertaken an initial check of your article and we have noticed that the article is unclear in places, making it difficult to assess the content. In order to improve flow and readability, we suggest that you reword any unclear sections.

Therefore, we would strongly suggest that the article is copyedited, either by a native English speaker or a professional copyediting service. There are many copyediting services available, but if you would like a list, we can provide some suggestions. However, please note that we do not have any arrangements with them, and are not able to guarantee the quality of their service.

In addition, we noticed that there may be some information missing from your manuscript; F1000Research endorses the [ARRIVE](#) guidelines for reporting animal studies. The ARRIVE checklist is especially helpful to make sure that all relevant information is recorded. Our [research article guidelines](#) may also be useful.

If there's anything we can help you with regarding your submission, please do let me know. I look forward to hearing from you within the next few days.

Best regards,

James

Dear Awaluddin

Novita Sari Harahap has submitted this manuscript:

The Effect of Red-fleshed Pitaya (*Hylocereus polyrhizus*) on Heat Shock Protein 70 (HSP70) Expression and Cortisol in Induced Strenuous Exercise Rats

Novita Sari Harahap *et al.* with Novita Sari Harahap as the corresponding author(s).

Funders: you have stated during the submission process that this work has been funded by: Kementerian Riset Teknologi Dan Pendidikan Tinggi Republik Indonesia (027/UN33.8/LL/2018)

Before accepting the article: we will check content suitability, readability and manuscript format; adherence to ethical standards for the type of study; that the underlying data have been supplied (where appropriate); and that there is sufficient detail to enable others to replicate the study (if applicable).

Before publishing the article: if we accept the article, we will be in touch with Novita Sari Harahap in the next two or three working days with any issues that need addressing and ask them for referee suggestions. They will then receive a final proof of the article for approval, prior to publication. At that stage, the peer-review process will begin, in accordance with our [publishing model](#).

After publication: to ensure you receive proper recognition for your professional activities, you can connect your ORCID iD to *F1000Research* so that all your *F1000Research* work is added to your account automatically once it is published. Details on how to do this will be sent in an email when the article is published.

All future correspondence about this submission will be sent to Novita Sari Harahap only. If you have not agreed to this submission and your inclusion as an author of this article, please contact us immediately quoting the article number: 17533.

Kind regards

The *F1000Research* Team

Manuscript 17533 conditionally accepted for publication

research@f1000.com <research@f1000.com>

Tue, Dec 18, 2018 at 5:39 PM

To: novitahrp74@gmail.com

Dear Novita Sari,

The Effect of Red-fleshed Pitaya (*Hylocereus polyrhizus*) on Heat Shock Protein 70 (HSP70) Expression and Cortisol in Induced Strenuous Exercise Rats
Harahap NS, Lelo A, Purba A, Sibuea A and Amelia R

Thank you for your submission to *F1000Research*. We have noted a few issues with your manuscript - once these are addressed we will be pleased to accept your article for publication.

Animal studies: *F1000Research* endorses the ARRIVE guidelines for animal research reporting. The comments in the manuscript provide some queries relating to the ARRIVE checklist, but these are not exhaustive. In addition, please provide an animal statement that confirms that all efforts were made to ameliorate any suffering of the mice and detail how this was achieved, as per our animal policies.

Figures: Please submit figures as separate TIFF or JPEG files at >300dpi.

Referees: As you know, *F1000Research* operates an author-driven publication model. This means that you will be responsible for suggesting suitable referees, whom we invite on your behalf, giving you an opportunity to ensure that appropriate experts referee your article. Our transparent peer-review process means that the referee report, together with the referee's name, will be published alongside your article.

We will need at least 5 suitable referees before we can publish your article, so we recommend identifying them now, if you have not done so already. Click to access My Referees, to enter your suggestions and/or use the Find Referees tool that will analyse your manuscript and suggest a list of referee candidates based on its content.

Please remember that they should have an appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). Suggestions are checked by the editorial team and rejected if they do not meet these criteria.

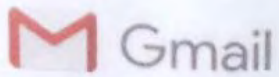

Payment: As *F1000Research* is open access, we will require payment of the APC to be able to complete the processing of your submission. As your article is currently classified as a medium length article, the APC is \$500. Please provide us with the name, postal address, e-mail address and VAT number (if applicable) of the person or single organization taking responsibility for making this payment. Our Accounts department will be in touch regarding payment.

We have also lightly copyedited your article - please [download the document](#) and check you are happy with the amendments and **then address our queries using track changes in Word. Please return your revised manuscript to the e-mail address above.** Please note that this is your final opportunity to make any changes to the content of your manuscript. Once the typeset PDF of your manuscript has been created, we will send you a final PDF proof for checking prior to publication.

Best wishes,

Molly
The Editorial Team, *F1000Research*

To: novitahrp74@gmail.com

Wed, Jan 2, 2019 at 11:11 PM

Dear Novita,

Thank you for sending in your revisions. There are some outstanding queries on your article:

- Please include a statement about how the suffering of the rats was reduced during the experiments.
- Please include how the rats were fed the extract.
- Please include the amount of anaesthetic used on the mice to sacrifice them
- You have included two Figure 1s in the manuscript. Please clarify.
- Your data must be uploaded to a repository, see information below.

We ask that authors submit their underlying/extended data to an online repository. More information can be found on our [data guidelines page](#), under the heading 'Data Hosting'. Please note, if you submit data to an online repository, please create a public registry in order to create a DOI, which will be stated and cited in the **Data availability** section of the manuscript. Please include the name of the repository, the doi in the *Data availability* section, along with the license the data is held under (please make sure that you choose a license when submitting your data to a repository – we would strongly suggest a [CC0](#) license).

Please also note that your article has been copyedited. Please do not edit the article apart from in the places indicated where more information is required.

Best regards,

Molly

Dear Novita,

Thank you for sending in your revisions. The only outstanding query relates to the raw data underlying your results. Please see our data guidelines for more information: <https://f1000research.com/for-authors/data-guidelines>. This data must be uploaded to an online data repository. I would suggest OSF. Please follow the instructions below to upload your data to an OSF project, obtain a DOI and obtain a license.

- Uploading data: <http://help.osf.io/m/projectfiles//482002-upload-files>
- Obtaining a DOI: <http://help.osf.io/m/sharing//524208-create-dois>
- Obtaining a license (please select CC0): <http://help.osf.io/m/bestpractices//611430-licensing>

Please provide me with the DOI you obtain so that I can enter it into the manuscript for you.

Best wishes,

Molly

Dear Molly Cranston
Senior Associate Editor of F1000Research

I have registered to OSF and uploaded the file as you suggested.
select the license into **"CC0 1.0 Universal"**

Here is the DOI of my article: (DOI 10.17605/10.17605/10.17605/1)

I really look forward for the update information towards the public
free to inform me related to my manuscript.

Best Regards
Novita Sari Harahap

The screenshot shows a web browser window with the URL <https://osf.io/1m34v/>. The page is titled "The effect of red-fleshed pitaya (Hylocereus polyrhizus) on heat shock protein 70 and cortisol expression in strenuous exercise induced rats". The author is Novita Sari Harahap. The page includes metadata such as the date created (2019-01-21 05:01 PM), the last updated date (2019-01-21 05:08 PM), the identifier (DOI: 10.17605/10.17605/10.17605/10.17605/1), the category (Project), and the license (CC0 1.0 Universal). There are sections for Wiki, Citation, and Components.

Dear Novita,

Thank you for sending the DOI. As I was sending your article to our production team, I noticed that there is one author on the manuscript, **Zulaini**, who has not been included on the author list.

Please provide this author's email address and CRediT roles (see table below).

Best wishes,

Molly

Contributor Role	Role Definition
Conceptualization	Ideas; formulation or evolution of overarching research goals and aims.
Data Curation	Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later reuse.
Formal Analysis	Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data.

novita hrp <novitahrp74@gmail.com>

Your article 17533 is now accepted

Dear Novita Sari Harahap,

Your article: The effect of red-fleshed pitaya (*Hylocereus polyrhizus*) on heat shock protein 70 and cortisol expression in strenuous exercise induced rats (ref: 17533), has been accepted for publication in *F1000Research*.

Please find your invoice attached. If you have any questions, please email us at the address below.

Ways to Pay your Invoice

To pay via credit or debit card using the secure Sage Pay service, click [here](#).

To pay by any other method, please see the instructions on the attached invoice.

Payment Tokens

We are in a temporary changeover phase affecting how we support token redemption and can currently not accept them online. However, if you have any payment tokens, please reply to this email with the token numbers and we will redeem them for you, and let you know if you have any remaining balance to pay.

Best regards,
F1000Research Accounts
