C. Comments to the authors (You may use another sheet of paper.)

There are four employments of informative media in the instructing and learning measure, in particular: 1). Explain the introduction of the message with the goal that it isn't verbalistic, 2).

Conquering the constraints of room, time, and tactile power, 3). The utilization of fitting and changed learning media can survive the inactive mentality of understudies, 4). Give a similar energizer, experience, also, insight for each understudy. Media which is by and large realized today is different sorts of mixes of designs, text, sound, video, and liveliness. The learning measure is a finished congruity, not irregular and detached occasions. Media is an indivisible piece of the instructing and learning measure. The term media is the plural type of medium which in a real sense implies center, delegate or presentation. A medium as an innovation for introducing, recording, sharing, and circulating images through certain tangible upgrades, joined by organizing data. All the more explicitly, the thought of media in the educating and learning measure will in general be characterized as realistic, visual, or electronic instruments to catch, measure, and remake visual or verbal data. In the conversation of media, the terms instructive media and learning media in some writing show a similar significance and can be utilized reciprocally. Instructive media are different sorts of parts in the understudy climate that can invigorate understudies to learn. E-learning will be discovering that utilizes electronic media both on the web and disconnected which is applied in customary training and distance training. On the off chance that e-learning is electronic-based discovering that can be utilized on the web and disconnected. In expansion, e-learning is a type of traditional discovering that is communicated in advanced configuration through web innovation. A site page is a record written in HTML (Hyper Text Markup Language) design, which can quite often be gotten to through HTTP, A convention that conveys data from a web worker to be perused by clients by means of an internet browser. Web can be deciphered as an assortment of pages used to show text data, still or on the other hand movement pictures, activity, sound, and a blend of every one of them both static and dynamic which structure a progression of interconnected structures, which every one of them presents with an organization of pages. In the meantime, as per the web is a spot on the web which comprises of a assortment of pictures, recordings and different documents that are put on a web worker, so they can be gotten to online by associations that enter through the web organization.
