

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### 5.1 Conclusion

The following conclusions can be drawn from this study after analyzing the data based on the theoretical basis used. It can be concluded that in Rans entertainment's vlog.

1. There are three types of entries from the five videos. They are One-way entailment, Two-way entailment based on Griffiths theory (2006), and Negative entailment based on Murphy (2003). Meanwhile, Mutual entailment is not contained in it. Of all the types of entailments, the most found is One-way entailment with 29 appearances, the second is Two-way entailment with 9 appearances, the third is Negative entailment with 6 appearances and the last one is Mutual entailment with 0 appearances because in the object there is no qualification of this type.
2. The realization of entailment in the Rans Entertainment vlog can be seen from the utterances it uses in the vlog. How entailment is manifested in the Rans Entertainment vlog can be analyzed from the entailments that are mostly found in the Rans Entertainment vlog. The most used Vlog Rans entertainment is One-way entailment, where first, the truth of the first sentence follows the second sentence. The second sentence becomes a sentence that confirms the truth of the first

sentence. and finally, the truth of the second sentence does not have to follow the first sentence is also true because it could be wrong.

3. The main reason why Entailments happen on the Rans Entertainment vlog as they do because entailment can appear wherever the language is used, including everyday conversation and in this vlog, Raffi and Nagita use their everyday language naturally, therefore entailment can appear. and in this research there are two reasons based on One-way entailment : a. If the first sentence is true then the second sentence is certain. b. If the second sentence is true, it is not certain that the first sentence is true it could be wrong.

## 5.2 Suggestions

Based on the results of the analysis that has been done, some suggestions are as follows:

1. I suggested that vlog is an interesting study to learn, because so far in the world of literacy that describes the phenomenon of entailment, most researchers only take study materials such as movies, novels, poetry, speeches, or song lyrics. Vlogs have become a trend in the digital era for now and become the best-selling target in the entertainment world, for that it's not wrong if we go through the times and start studying the words or languages used in vlogs, especially in this Rans Entertainment's vlog, there are lots of new experiences that can be we look primarily for knowledge of what the situation or circumstances are in Europe when they travel around the world.

2. This research is discussing the types on the basis of the types that occur most often. Therefore, this is a good opportunity for other researchers to carry out further studies, especially in exploring the meaning entailment in different objects.
3. It is recommended for readers, especially for linguistics students. It is important for linguistics students to recognize linguistic phenomena, especially the phenomenon of entailment. Therefore, the researcher suggests more students do research in the field of semantics, especially about meaning relations which are important to understand in order to build a successful conversation.
