Dear Author(s),

We have received the review reports for your paper "Measuring The Valuable Antecedents of Instructional Leadership In Educational Organization".

We require now that you implement in your submission the following recommendations made by the reviewers until 1 Dec 2019:

Reviewer A Comments:
=====

Changes which must be made before publication:
This paper deals with instructional leadership, however the concept needs to be further explained.

1. The introduction is somehow blurred and it does not express the actual research problem. Also, state your research questions clearly in this part of the research.
2. A serious concern is that the paper does not provide anything new. What is your contribution to management in education? It has to be clear.
3. Validation of this data set is one of the requirements to perform a PLS model. It is not enough that the validity of this model had been discussed prior to this research and was already validated. Your dataset needs to be validated. I prefer that you delete the paragraph with such statements. Please be more precise with data validation (VIF values and other measures need to be introduced.) Explain the outer model and the inner model in detail.
4. A discussion needs to be supported by other scholars research findings.
5. Limitations and conclusion of the study is missing.
6. More recent references need to be used.
7. Your terminology needs to be consistent. When you refer to resource capacity it can be many things. Use human resources consistently.
8. Explain all construct in the literature review, why did you select the constructs and provide

Changes which must be made before publication:

1. The study was conducted in more than one school. However, the title of the research does not reflect that. Also, trust is the construct investigated in the paper. Perhaps you want to relook at the title again and consider to include "trust" in the title.
2. Add more recent references in the introduction section. What studies on Instructional leadership have been conducted in the recent years?
3. "The various studies above indicate that instructional leadership has conformity with the characteristics of educational organizations." Provide references for this statement. Say something about the studies.
4. 352 questionnaires were returned. It is surprising to note that all the 352 returned questionnaires were good for analysis.
5. Why snowball techniques was used in the research? Was there an issue to find respondents in schools? For this kind of research, normally if the approval was granted from the Ministry of Education or department concerned, researchers can easily identify the schools.
6. What is retiring age of the school teachers? It table 1, there is none of the respondents who are above 50.
7. Further discussion required:
 - a. To what extend are the research's findings relevant/generalizable to other schools in Sumatra or Indonesia as a whole ?
 - b. what are the policy recommendations for the Sumatra/Indonesia Ministry of Education?
8. There is a need to pay attention to English language throughout the paper. It needs to be sent for professional proofread and edit before resubmit to this journal or another.
