The screenshot shows a Gmail interface in a web browser. The browser's address bar displays the URL: <https://mail.google.com/mail/u/0/?tab=wm&ogbl#sent/FMfcgxmZTcNTZTHmQdkbpPfgbkPfbnNv>. The Gmail header includes the search bar with "in:sent" and the "G Suite" logo. The email title is "Submit manuscript Nugraha, et. al". The sender is "ASEP WAHYU NUGRAHA <aw.nugraha@unimed.ac.id>" with a profile picture and a "to neochem" tag. The recipient is "Editor of Russian Journal of Inorganic Chemistry". The subject is "Paper submission". The email is dated "Mon, Mar 12, 2018, 11:55 AM" and was sent from "Bandung, March 12, 2018". The body of the email contains the following text:

To: Editor of Russian Journal of Inorganic Chemistry  
Object: Paper submission

Dear Editor,

I am very pleased to submit a new manuscript with a title:  
"Theoretical study on the structure prediction and molecular formula determination of the polymeric complexes comprising Fe(II) and 1,2,4 H-triazole ligand"

Thank you very much for your kind considerations.  
I look forward to hearing from you.

Yours sincerely

At the bottom of the email, there is a watermark for "UNIMED UNIVERSITY" and a "Character Building" logo. A "Windows" watermark is also visible in the background. The Windows taskbar at the bottom shows several open PDF files named "InrgChem1906012...pdf" and the system clock displays "10:20 PM 7/15/2019".

1 look forward to hearing from you.

Yours sincerely

Dr. Muhamad A. Martoprawiro

Dear Dr. A. Nugraha  
Dear Dr. M. Martoprawiro,

your submission entitled «Theoretical study on the structure prediction and molecular formula determination of the polymeric complexes comprising Fe(II) and 1,2,4-H-triazole ligands» has been received by Russian Journal of Inorganic Chemistry.

We will contact you again with the decision on this paper after its consideration by our referees. It can take about one or two months.

Please, always indicate the paper code of your manuscript in your letters for us.

Kind regards,  
Varvara Aydeeva

**Reviewer's comments:**

1. Abstract should be shortened, because some part of it is the Introduction. Results and Conclusions must be reported in the Abstract.
2. The figures must be corrected. Atoms Fe, N, and C in Figs. 1 and 2 as well as in Table 1 should be labelled. Figure 3 should be present in a better quality.
3. The data from tables 2 and 3 should be supplied with the data obtained by others DFT methods in addition to B3LYP/6-31G(d) methods, namely by M062x/6-31G(d) and TPSSh/TZVP. This fact will allow authors to compare values of not only energies but also bond lengths obtained by different methods.
