

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

Based on the result of the data analysis in the writing test of descriptive text at the first grade in senior high school at SMA Nurul Iman Tanjung Morawa, it can be concluded that from the data especially in 19 students of class X MIA-2 was considered as the good level. There are 6 or 32% students who belongs to excellent category, 2 or 10% students who belongs to very good category, 2 or 10% students who belongs to good category, 3 or 16% students who belongs to fair category, and 6 or 32% students who belongs to poor category. From nine indicators in assessing writing test of students about descriptive text especially about tourist attraction, it can be seen that students' ability in the first, third, fifth, and seventh indicator belongs to fair category, the second and fourth indicator belongs to good category, the sixth, eight, and ninth indicator belongs to poor category.

B. Suggestions

After analyzing the data and making conclusion, the researcher has some suggestions for teacher, students, and the next researchers, as follows:

1. For the English Teachers

The teachers also should concern to teach the students about the writing process and aspects in writing so the students will be able to produce a good writing especially in descriptive text. And then, the teacher should analyze students' work to find the

strength and weakness in writing so that the teacher can teach effectively in students needed.

2. For the Students

The students need to improve their ability in constructing a descriptive text. Somehow the students still have to keep develop their writing ability especially in descriptive text in each other aspects so that their ability also can be enhanced, so students need to improve practice to write correctly.

3. For the Other Researcher.

The result of this research can be used as additional reference for the other research. They are able to conduct other research relating to the students' ability in writing descriptive texts and this study hopefully able to give input for them who want to conduct developmental research especially on analyzing students' ability in writing or in the other skill.
