

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the findings as presented in previous chapter, conclusions were drawn as the following:

- 1) It was found that among the four features of instagram video post, the regular timeline post is the most dominant feature with percentage 63.64%, followed by IGTV 31.82% and instagram live 4.54%. None is interested to use the story feature.
- 2) The use of instagram video post is becoming learning and teaching media. This was proven by the teacher through instagram live and the students were giving good feedbacks on the comment section. The students were also learning by practicing their speaking skill on posting their videos in which they were explaining about a social issue.

B. Suggestions

In line with findings, suggestions were staged as follow:

- 1) For the other research hopefully this research will be useful to conduct another research further to improve their knowledge

- 2) Since this study was only conducted in one class, the number of bigger sample would be useful through this research
