

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1. Conclusion

Based on the research that has been done, it can be concluded as following:

1. Students are declared capable of using online learning platforms indicated by the average results of internet searching 88% hypertext navigation 87%, content Evaluation 85% and Knowledge Assembly 81%.
2. Biology students understanding of midterm and final semester exam scores is said to be in the very high category with an average score of 87.54%.
3. There is a correlation between student learning literacy and maser the concept through the online learning platform with a correlation of recount = 0.71297. So students have been able to take advantage of use the online learning platform well in plant morphology course.

#### 5.2. Suggestion

Based on the result and discussion along with the conclusion, the suggestion which is given as follows:

1. Students need to improve their ability to use the Platform in the learning process, so that information retrieval can be carried out more effectively and efficiently.
2. Researchers expect readers to give criticism, suggestions, feedback, and input on this thesis in order to improve or correct the thesis for the common good.
3. For further research, this research can be used as a source of literature, so that there is a more innovative expansion in the next learning process. The study would like to thank the readers for the opportunity of their time.
