

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. Conclusions

Generally, the existing students' English listening material do not match the students of Multimedia Study Program needs at SMK Broadcasting Bina Creative Medan. Students of Multimedia Study Program need listening material which is relevant and suitable to their study major especially in broadcasting work situations. They need learning activity which benefits to improve their knowledge about broadcasting and learning filming or the things of shooting which benefits to help them in their preparation for looking a job in the future.

The product or English listening material is designed based on the five stages in scientific approach, namely; 1). observing, 2). questioning 3). exploring 4). associating, and 5).communicating. The average score of product validation from both validators is 4.69 that is categorized as very good. Thus, the developed students' English listening material is categorized as relevant and suitable to be used by grade XI students of SMK Broadcasting Bina Creative Medan.

#### B. Suggestions

In line with the conclusion above, some suggestions are recommended as follows:

##### 1. Students

The grade XI students of Multimedia Study Program should create a communicative circumstance in English classroom by being involved actively in

learning activities. The well designed English listening material, good teacher or best learning instruments will not give any significant help to support students' learning achievement if the students do not participate actively in teaching and learning process.

## **2. English Teachers**

English teacher is one of important factors to make teaching and learning process become successful. To achieve the goal of the study, it is suggested to English teacher to develop and apply students' English listening material as one of the alternative ways to help students increase their ability especially in listening skill and achieve the learning goal as well.

## **3. Other Worksheet Developers**

Since this research only focuses on developing the English listening material for the grade XI students of Multimedia Study Program at SMK Broadcasting Bina Creative Medan, it is expected to other researchers to develop English listening material for other genre, major or grade to improve the quality of learning English for vocational high school especially in multimedia study program.
