The results of data analysis using data using multiple regression and hypothesis testing concluded that entrepreneurship education and family environment motivation have an effect on students' interest in preserving family businesses. This can be seen from the results of multiple linear regression, the equation $Y = 1,204 + 0,344 (X_1) + 0,542 (X_2) + e$. Furthermore, it can be seen that there is a significant value between Entrepreneurship Education and Interest in Preserving Family Business which is indicated by the t value $> t$ table where $2,658 > 0,683$ with a significant value of $0.010 < 0.05$. Simultaneously (F test) is indicated by the value of F table $> F$ count where $0.007 < 0.05$. Simultaneously (F test) where $377.342 > 3.346$ with a significant value of $0.000 < 0.05$, so it can be concluded that the hypothesis is accepted, thus it can be concluded that entrepreneurship education and family environment motivation have a positive and significant effect on the interest in preserving family businesses on interest Preserving Family Business Among Students of 2018 Stambuk Business Education Faculty of Economics, State University of Medan
