## **PREFACE**

Praise and gratitude to God Almighty who has given His mercy and grace, so that the author can complete this thesis well. This thesis was prepared to fulfill some of the requirements needed to achieve a Bachelor of Education degree at the Chemistry Education Study Program, Faculty of Mathematics and Natural Sciences (FMIPA), Universitas Negeri Medan (Unimed).

The preparation of this thesis has gone through a long and tiring road and various stages in accordance with standard procedures applicable at FMIPA Unimed, starting from the stage of determining research topics, drafting and seminar proposals, conducting research, drafting theses, and defending thesis exams. The selection of research topics is based on current problems related to the development of Android-based interactive learning media during the COVID-19 pandemic.

The author realizes that the preparation of this thesis could not be completed without the support of various parties, either directly or indirectly. Through this opportunity, the author would like to express gratitude to all those who have helped in the preparation of this thesis. Thanks are conveyed to the Rector of Unimed, Mr. Dr. Syamsul Gultom, SKM., M.Kes. along with all Vice Chancellors as leaders of Unimed, Dean of FMIPA Unimed, Mrs. Prof. Dr. Fauziyah Harahap, M.Si. and all Deputy Deans as leaders of FMIPA Unimed. A big thank you is also conveyed to Prof. Dr. Ramlan Silaban, M.Si., as Thesis Supervisor, for his extraordinary guidance, motivation, and direction so that all stages in the preparation of this thesis can be passed well. To Mr. Dr. Ayi Darmana, M.Si., Mrs. Prof. Dr. Ida Duma Riris, M.Si., and Mr. Feri Andi Syuhada, S.Pd., M.Pd., as Examining Lecturers, who have given many criticisms and suggestions for improvement starting from the proposal seminar to the stage of the thesis examination, so that the thesis this can be solved well too. The author also extends his infinite gratitude to Mr. Dr. Zainuddin Muchtar, M.Si. (Lecturer of Chemistry at Unimed), Mr. Ricky Andi Syahputrah, S.Pd., M.Sc. (Lecturer of Chemistry at Unimed), Mr. Sajali Surbakti, S.Pd., M.Si. (Chemistry teacher at SMAN 12 Medan), and Mrs. Rika Saidah Lubis, S.Pd. (Chemistry teacher at SMAN 12 Medan) for his invaluable assistance through media validation and research instruments.

The author also does not forget to thank Mr. / Mrs. Lecturer and Staff of the Department of Chemistry, Faculty of Mathematics and Natural Sciences, UNIMED, who have helped the author. Thanks to Dra. Murniaty Simorangkir, M.S., as Academic Advisor (PA) who has provided academic guidance and motivation to the author. The authors also thank the Principal of SMAN 12 Medan, Mrs. Dra. Ade Melinda Banjarnahor, M.Si. and Chemistry teacher, Mrs. Rika Saidah Lubis, S.Pd., for her help, willing to accept and give freedom to the author to conduct research at the school.

In particular, the author would like to thank my beloved family who always provide motivation and prayer support. The author dedicated all the struggles up to this point to the two most valuable people, author's parents, Mr. Jansen Nababan and Mrs. Berliana Pasaribu. The author also would like thank to sister Yossi Kristayanti Nababan, brother Ruben Andika Nababan, Grandpa Reguel Nababan and Grandma Tonggo Gurning, uncle H. Pasaribu, S. Santana/br Sinaga family, C. Hasibuan/br. Samosir family and all members of big family for all the prayers and support, as well as the spirit that is always given to the author to be able to finish this thesis.

The author would also like to thank my beloved person, Svencer Pangoloi Tampubolon, who patiently accompanies and supports the author in every work of this thesis. Thank you for providing a shoulder to cry on and providing help when the author needed it. Thank you to author's friend in arms (Titin Manalu, Felix Sianturi, Maydline Marbun, Elssya Manullang, Ester Sirait) and author's bestie (Rina, Dewi, Puja, Dhea, Anggi, Masyita) who witnessed the author's struggle in completing the lecture. The author would also like to thank the big family of Bilingual Chemistry 2018 who have fought together and supported the lecture stage to the completion of this thesis. This thesis is dedicated to people whom the author cares about. Sometimes, when I lose faith in myself, you guys are there to believe in me.

The author realizes that this thesis still has shortcomings and limitations, however, this thesis can be useful for related parties, especially in perfecting the development of Android-based interactive learning media in the world of education.
