

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### 5.1 Conclusions

By referring to the data analysis, findings and discussions which are elaborated in the previous chapter, these following conclusions are drawn:

1. Those five types of feature conversational style was identified and found 5 feature was found successfully from the eight eleven talk show; they are amount of talk , interruption , conversation support, compliment. Based on the data of the features of conversational style used by female presenters are higher in using amount of talk and conversational support than male presenter do in the talk show news. Meanwhile male are higher in using interruption and compliment than female do.
2. The different ways of communication between male and female presenters in Eight eleven talk show program on metro TV conclude that the male presenters are able to communicate by female like strategies. And then vice versa female speakers are able to communicate by male like strategies in this talk show.
3. Male and female presenters are used by style differently in the talk show news, it is because male and female presenters have different characteristic in social life, and these characteristic have affected them to be having different style in doing communication.

## 5.2 Suggestions

In relation to conclusions which have been state previously, some constructive points are suggested as the following:

1. In relation with the finding in this study, it is suggested to the student who want to study about sociolinguistic branch above all in mastering the characteristics of male and female speakers in making the interaction.
2. It is suggested for other researcher, who want to elaborate the study about gender differences and conversational style in other field.
3. It is suggested for readers to develop the theory of gender conversational style in due to the interaction in other field.
