ABSTRAK

Yeni Risma Uli ; NIM; 5153342015; Hubungan Dukungan Teman Sebaya Dengan Hasil Belajar Pastry Dan Bakery Di SMK Putra Anda Binjai ; Skripsi Jurusan Pendidikan Kesejahteraan Keluarga. Program Studi Pendidikan Tata Boga. Fakultas Teknik Universitas Negeri Medan 2023.

Penelitian ini bertujuan untuk mengetahui: (1) Dukungan Teman Sebaya, (2) Hasil Belajar Siswa Pada Pelajaran Pastry dan Bakery; (4) Hubungan Dukungan Teman Sebaya siswa dengan Hasil Belajar Bakery Pastry; Lokasi Penelitian di SMK Putra Anda Binjai. Waktu penelitian Juni 2022. Populasi dalam penelitian ini adalah seluruh siswa kelas XI SMK Putra Anda Binjai, dengan jumlah 32 orang siswa. Teknik penentuan sampel secara total sampling sehingga diperoleh jumlah sampel sebanyak 32 siswa. Teknik pengumpulan data menggunakan angket dan tes. Untuk pengumpulan data dukungan teman sebaya menggunakan angket dan data Hasil Belajar Bakery Pastry menggunakan tes. Teknik analisis data secara deskriptif, uji kecendrungan, uji persyaratan analisis menggunakan uji normalitas dan uji lineritas, dan uji hipotesis menggunakan uji korelasi produk moment.

Berdasakan hasil penelitian ini menunjukkan bahwa tingkat kecenderungan dukungan teman sebaya siswa 53,12 persen dan Tingkat kecenderungan Hasil Belajar Bakery Pasty cendrung tinggi sebesar 84,37 persen. Hasil analisis *product moment* terdapat hubungan yang positif dan signifikan antar Dukungan Teman Sebaya dengan Hasil Belajar Bakery Pastry $ryx_1x_2 = 0,47$ dan nilai koefisien korelasi *product moment* $t_{hitung} > t_{tabel}$ $(0,11 > 0,589)$. Artinya semakin tinggi Dukungan Teman Sebaya Siswa maka semakin tinggi Hasil Belajar Bakery Pastry.

ABSTRACT

Yeni Risma Uli; NIMs; 5153342015; Peer Support Relations with Pastry and Bakery Learning Outcomes at Putra Anda Binjai Vocational High School; Thesis Department of Family Welfare Education. Culinary Education Study Program. Faculty of Engineering, Medan State University 2023.

This study aims to determine: (1) Peer Support, (2) Student Learning Outcomes in Pastry and Bakery Lessons; (4) Student Peer Support Relations with Bakery Pastry Learning Outcomes; Research Location at SMK Putra Anda Binjai. Time for research in June 2022. The population in this study were all class XI students at SMK Putra Anda Binjai, with a total of 32 students. The technique of determining the sample is total sampling so that a total sample of 32 students is obtained. Data collection techniques using questionnaires and tests. To collect data on peer support using a questionnaire and data on Learning Outcomes of Bakery Pastry using a test. Descriptive data analysis techniques, trend test, requirements analysis test using the normality test and linearity test, and hypothesis testing using the moment product correlation test.

Based on the results of this study, it shows that the level of tendency for peer support of students is 53.12 percent and the level of trend in Learning Outcomes of Bakery Pasty tends to be high at 84.37 percent. The results of the product moment analysis show that there is a positive and significant relationship between Peer Support and Learning Outcomes of Bakery Pastry $ryx1x2 = 0.47$ and the value of the product moment correlation coefficient $tcount > ttable$ ($0.11 > 0.589$). This means that the higher the Student Peer Support, the higher the Bakery Pastry Learning Outcomes.
