Respected Rosmala Dewi,

We are in the process of preparing your manuscript for publication.
By doing so we encountered several issues with the reference style used. As our journal uses Vancouver citing (examples are pasted below), please adjust your manuscript accordingly. Furthermore, in the text all references have

to be in the form of numbers in square brackets (eg [1], [23-27], etc.).

References: The list of references should be written on a separate sheet of paper, numbered according to the first appearance in the text. The Vancouver style should be followed thereby, e.g.:

Article in journal: Name all authors if there are six or less; references with more than six authors should be followed by »et al«. The title of the journal should be abbreviated according to *Index Medicus*:

Marušić S, Thaller V, Katinić K, Matošić A. The significance of family therapy in the process of treatment of alcoholism. *Alcoholism* 2000;36:51-60.

Journal supplements:

Lundstrom I, Nylander C. An electrostatic approach to membrane bound receptors. *Period Biol* 1983;85(Suppl 2):53-60.

Books and monographs:

Personal author or authors Eisen HN. *Immunology: an introduction to molecular and cellular principles of the immune response*. 5th ed. New York: Harper and Row; 1974. p. 406.

Editor

Dausset J, Colombani J, eds. *Histocompatibility testing 1972*. Copenhagen: Munksgaard; 1973. p. 12-18.

Chapter in book:

Weinstein L, Swartz MN. Pathogenic properties of invading microorganisms. In: Sodeman WA, ed. *Pathologic physiology: mechanism of disease*. Philadelphia: WB Saunders; 1974. p. 457-472.

Proceedings:

DuPont E. Bone marrow transplantation in severe combined immunodeficiency with unrelated MLC compatible donor. In: White HJ, Smith R, eds. *Proceedings of the Third Annual Meetings of the International Society for Experimental Hematology*. Houston: International Society for Experimental Hematology; 1974. p. 44-46.

Dissertation:

Kaplan SJ. *Post-hospital home health care: the elderly's access and utilization (dissertation)*. St. Louis (MO): Washington University; 1995.

References will not be checked by the Editorial Office. Responsibility for their accuracy and completeness lies with the author.

Please send your reference adjusted manuscript via this e-mail .

With kind regards,

Vjekoslav Peitl, MD, PhD
deputy editor

Dear Vjekoslav Peitl, MD, Ph.D.
Deputy Editor of Archives of Psychiatry Research

Thank you for your information regarding the publication process of our manuscript. According to your advice, we have revised the references of the manuscript to be Vancouver citing style as the journal style.

May you review further about the revised manuscript. We will glad to receive any further information or advice regarding the manuscript.

Thank you for your kind attention and thank you for accepting our paper to publish in the Archives of Psychiatry Research.

Sincerely,

Prof. Dr. Rosmala Dewi, M.Pd, Kons

Respected Rosmala Dewi,

There is only one thing we have to clear about your manuscript. Namely, the authorship of the figures. Therefore our question is if they are your product or have been taken from another source. If later is the case please provide the source and permission to publish the figures. Otherwise, we will have to omit them from publication.

Sincerely,

Vjekoslav Peitl
deputy editor
Archives of Psychiatry Research

Dear Vjekoslav Peitl, MD, Ph.D.
Deputy Editor of Archives of Psychiatry Research

Thank you for patiently responding to the articles we send to you and waiting for our response.

1. Associated with the results of data analysis presented in tables 1,2,3 and 4 are processed results from the data collected in the research we conducted
2. Regarding figures 1 and 2, these figures are the models that we have developed in this study.

We hope our response can provide satisfying confirmation, and we are waiting for positive results for the publication of our article.

Sincerely,

Prof. Dr. Rosmala Dewi, M.Pd, Kons
