Dear SANUSI HASIBUAN,

We have received reviewer's comments on the manuscript language.

Please adjust your paper according to the comments and requests provided in the document.

1. I can't find specific comments from table 2, so I can't get a full understanding of the author's perspective or argument. This might help change some of my opinion. Some of the comments have been handled very well.
2. There is a mismatch between what you are going to try to measure and your self-stated goal. Therefore, you really need to put a lot of effort into reshaping your argument or redefining the path analysis that was done; the first path is a three-equation model, and the second path is a one-equation model.

Send your paper back to us within 7 days from now.
