Dear Dr. Hasairin, Greetings

Thank you for sending in your research paper for review, with the topic "Characterization of Lichens in Rocks (Saxicolous) in The Bukit Barisan Forest Park, Tongkoh, Karo District, Indonesia." This email is to let you know that the review assessment committee has suggested major changes to your research article. In the attached files, every remark is clearly mentioned. Please note that significant revisions are required. In case all suggested changes are not incorporated, the paper will be considered as rejected.

Please be informed that your article is 29% plagiarized (report attached). Whereas the acceptable limit is 20% or less. You need to first remove its plagiarism to 20% or less. Make sure that each source is less than 5%.

Make a careful effort to include all the modifications suggested by the reviewers. Do not forget to highlight all the changes in the revised document. You can submit the revised article before July 5, 2023.

If you need any assistance, feel free to contact us.

Best Regards

Editor

Dear Editor,

I have revised the paper to address reviewer comments as shown below and attach both file revision and response sheet.

Thank you,

Dr. Hasairin

Review RESPONSE SHEET Report

Critical Review of "Characterization of Lichens in Rocks (Saxicolous) in The Bukit Barisan Forest Park, Tongkoh, Karo District, Indonesia"

Abstract:

The abstract of the article titled "Characterization of Lichens in Rocks (Saxicolous) in The Bukit Barisan Forest Park, Tongkoh, Karo District, Indonesia" does not follow a proper structure. It lacks the essential elements, such as the research objective, methods, key findings, and conclusion. The abstract should be revised to provide a concise summary of the study.

REPLY: Tried our best to improve as desired.

Introduction:

The introduction of the article fails to address the theoretical and practical significance of the research adequately. The author should clearly explain why the study on the characterization of lichens in rocks is important and how it contributes to the existing knowledge. The introduction should also include a justification for selecting this particular topic, highlighting the gaps in the existing literature on the subject matter.

REPLY: Tried our best to improve as desired.

Objectives:

The objectives of the study are not clearly defined. The author should provide a clear statement of the research objectives, specifying what they aim to achieve through this study. The objectives should be specific, measurable, achievable, relevant, and time-bound (SMART).

REPLY: Tried our best to improve as desired.

Literature Review:

The article lacks recent citations from the last five years, particularly in the introduction and discussion sections. It is essential to include up-to-date references to demonstrate familiarity with recent research in the field. The author should review the relevant literature and incorporate recent studies to strengthen the theoretical framework and contextualize the research findings.

REPLY: Tried our best to improve as desired.

Methodology:

The article mentions the use of an exploratory study, but the justification for this choice is lacking. The author should explain why an exploratory study design was selected and how it aligns with the research objectives. Providing a rationale for the chosen methodology will enhance the credibility of the research.

REPLY: Tried our best to improve as desired.

Discussion:

The discussion section should include a comparison of the current study's results with those of previous studies on the characterization of lichens in rocks. This comparison will allow readers to understand the novelty of the findings and their implications for the field. Additionally, the author should discuss the theoretical and practical implications of the research findings, addressing how they contribute to existing knowledge and their relevance to practitioners in the field.

REPLY: Tried our best to improve as desired.

Implications and Limitations:

The article lacks a discussion on the implications of the research for both theory and practitioners. It is important to highlight the potential implications of the findings in terms of advancing theoretical frameworks and providing practical insights for professionals in the field. Furthermore, the author should

address the limitations of the study and provide directions for future research to enhance the readability and academic value of the article.

REPLY: Tried our best to improve as desired.

References:

The author should ensure that all references are formatted according to the APA style guidelines. Additionally, it is important to maintain consistency between the in-text citations and the bibliography. Careful proofreading and cross-referencing should be conducted to correct any inconsistencies or errors in referencing.

REPLY: Tried our best to improve as desired.

Dear Dr. Hasairin, Greetings

Thank you for sending us the revised file. I appreciate your effort to incorporate reviewer comments; however, still, there is a need for a few minor changes. All comments are given in the attached file. Please make your file in compliance with these suggestions and resubmit for further processing.

Best Regards
