CHAPTER V

CONCLUSION AND SUGGESTION

A. **Conclusions**

Based on the research results on the chapter IV, it was obtained a conclusion that the students give negative perception of online English learning in the Covid19 pandemic. It can be seen from the total number of negative responses which obtain 172 answers or 96.7%.

B. **Suggestions**

Referring to the conclusions above, several points suggested as follows:

1. For school, to be able to carry out online English learning, firstly, we must provide facilities and infrastructure such as cellphones and internet data packages so that learning can be applied

2. The English teachers are advised not to complicate learning with an online learning system because the most important thing is that students continue to study while the school is closed.

3. The students must be able to improve their skills and knowledge in technology and computers so that online English learning can be done easily.

4. The researcher, this finding is a basic information to increase the knowledge of online English learning models in the Covid-19 pandemic
