

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. The conclusion

After analyzing the data, the researcher concluded that the students' existing media was not interesting, and also the media that being used by the teacher was not effective enough to make the students understand about the speaking descriptive text. The students found it was difficult for them to speak up and afraid of making mistake. They want to have the interesting and appropriate media which motivate them to learn speaking descriptive text. The solution for them was developing the new learning media. Developing Motion Pictures was adapted by the theory of Borg Gall and Gall (2003) which was simplified into, (1) Gathering Data and Information, (2) Need Analysis, (3) Design Media, (4) Validate by Expert, (5) Revision, (6) Final Product. From the results of experts' assessment, the average percentages are 89, 6%, so it categorized as "Very Good" as it position in the range 81-100. So, it can be concluded that Motion Pictures as a media for teaching speaking skill is valid and appropriate to use as learning media for students.

## **B. Suggestions**

Based on the results of research obtained, there were some suggestions given for the consideration the future:

### **1. To the English Teachers**

Media is one of the important tools that affect the success of teaching learning process, especially in teaching speaking descriptive text. Therefore, the teacher of junior high school in teaching speaking should use an interesting media such as Motion Pictures to increase students' interest and motivate them to study. The teacher should try and learn to develop English learning media, which appropriate to the students' needs. Meanwhile, the teacher should be able to use the technology in creating and use media for teaching and learning process.

### **2. To the Students**

The students are expected to be more active in learning English especially in speaking because English is one of the international languages. The students can use Motion Pictures as a media to help their enthusiasm and motivate them to improve their speaking skill.

### **3. To other Researcher**

The aim of this study is only focused in developing an audio-visual learning media, so further research will be needed to determine the effect of using this Motion Picture on students' achievement in order to get the accurate evaluation. Meanwhile, they can use this research as the reference for their study.
