

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consist of coclusions and suggestions of the study. In this chapter, the analysis of the data and the discussion of the result would be reiterated and summarized accordingly. Some suggestions are presented regarding the proposed study and recommended future works related to the study that could be conducted by other researchers.

5.1. Conclusion

Based on the result of the research discussed in the previous chapter, it can be concluded that:

1. Hypermedia iSpring Suite 9 is really easy to use even for all people. This software is integrated with Microsoft PowerPoint and this software can use in an online or offline session. The teacher implemented this software well based on the Lee and Owens (2002) ADDIE theory (Asessment/ Analysis, Design, Development, Implementation, Evaluation).
2. This iSpring Suite 9 media are easy to use and suitable for all of the learning styles of the students and easy for the teacher to teach the students and the students easy to understand the material that already taught by the teacher in the classroom.

5.2. Suggestion

Based on the conclusions, the researcher offered some suggestions that can be a good distribution in order to increase the quality of teaching and learning process.

1. Teacher must learn how to use media to help the process of teaching and learning in the classroom to make the process become easier and interactive.
2. The researcher hope that the next researchers will continue this reserach by conducting further research with the specific subject such as speaking, listening and writing.
