

ABSTRACT

Batubara, Ahmad Fachroziy. Registration Number: 2171121001. Teacher's Strategy In Accommodating Students' Learning Styles In English Teaching At Smp Negeri 1 Ujung Padang. A Thesis. English Educational Program, English and Literature Department State University of Medan, 2022.

Learning style is a student's proclivity to adopt a few strategies in their learning as a type of choice to develop a learning strategy that is acceptable for classroom instruction or at school as well as from subjects. In this case, the researcher found two problems in the learning style, the first was what type of learning in the class and the second was how the teacher's strategy was to accommodate this learning style. The goals of this research were to find out the types of student learning styles within the classroom and to determine the teacher's strategy in accommodating of students with learning styles in an English class at SMP Negeri 1 Ujung Padang. Researcher used qualitative research methods with data collection instruments by observation, questionnaire, and documentation. Using Fleming's Visual, Auditory, Kinesthetic (VAK) (1987), these results show that among the three possibilities of having different learning styles it is seen that different learning styles are visual (40%), auditory (40%), and kinesthetic (20%). The second finding is about the strategies used by teachers, as said by Levy (2008) by combining three learning styles, namely visual, auditory and kinesthetic learning styles into one structured teaching strategy.

Key words : Learning Styles, Teaching Strategies
